

SmartRad Mirror electric radiator

effective from 29th June 2010

SmartRad Mirror is perfect for bathrooms – an electric radiator with a mirror on the front not only heats the room, but it also helps create space and light in the 'smallest room in the house'.

SmartRads working together as a centrally controlled heating system - pick and mix from the SmartRads range to create the perfect heating system for your space. One SmartRad Controller is needed for each heating zone.

SmartRad as a stand-alone unit – each radiator has a simple on/off switch. SmartRad Controller is not necessary to operate one SmartRad working alone, but may be desirable for greater control (thermostat and timer).
